

Anti-spot Hand Cream

Properties

Protective, soothing properties, moisturises skin in depth and reduces age spots.

Phases	Commercial name	INCI Name	Function	%
A	Water	Aqua	Solvent	QSP
B	Xanthan Gum	Xanthan gum	Viscosity modifier	0.7
B	Emulgin SG	Sodium stearyl glutamate	Chemical emulsifier	0.4
B	Citric Acid	Citric acid	pH buffer	QS
B	Frametime CX	Bentonite & Xanthan gum & Citric acid	Physical emulsifier	5
B	Lightime	Bentonite & Balanites roxburghii seed extract	Anti-spot active ingredient	1
C	Desert Date Oil	Balanites roxburghii seed oil	Protective agent	20
C	Vitamin E	Tocopherol	Antioxidant	0.3
C	Shea Butter	Butyrospermum parkii butter	Nourishing agent	4
B	Preservatives	NA	Preservative	QS
C	Perfumes	NA	Fragrance	QS

pH 5.5- 6.0

How to formulate

Add the powder phase (B) to the oil phase (C) and mix until completely dispersed. Then add the water phase (A) using a high-shear mixer until completely homogenised (the more the cream is homogeneous, the more the emulsion will be whiter).
